INTRODUCTION

Degrees awarded by postsecondary institutions in Oregon are summarized in this report. These data are obtained from a completions survey administered by the U.S. Department of Education's Center for Education Statistics. The completions survey is one of a series of surveys collectively knows as the IPEDS Survey (Integrated Postsecondary Education Data System) which replaced the HEGIS survey in 1987.

Data on postsecondary degrees were published annually by this office from 1968-69 to 1989-90. This is the first new report since that time. Graduates of proprietary schools were formerly reported, but have been excluded recently since the available data are incomplete.

The system for classification of instructional programs used in this report is the same system that is used by the National Center for Education Statistics. This scheme, known as CIP Codes consists of groups of instructional programs termed "program areas" in this report, such as Education; and subcategories we refer to as "specific programs," such as Education Administration, within each of the broad program areas.

In this report, summary tables of degrees awarded precede the more detailed tables. Summary tables are arranged by institution, by program area (CIP Code), and for first professional degrees followed by tables showing racial/ethnic background in similar formats. Detailed tables are organized in two major sections: degrees awarded by each institution in segment groupings (State System, Community Colleges, and Independent), and degrees awarded by each major program area. Each table is followed by a table showing racial/ethnic breakdown in similar format.

This report summarized only associate, bachelor's master's, doctoral, and first professional degrees. Associate degrees are awarded upon completion of the requirements for two-year programs at community colleges and other institutions. First professional degrees are awarded in fields such as law, medicine, and theology.
